Early December 2014

PRODUCT SPECIFICATION

Over many years the ARB Premium Recovery Kit (RK9) has proved a popular accompaniment to many 4WD vehicles. Adding to the product range and available as a complete boxed kit is the new ARB Essentials Recovery Kit (RK11), which provides the base essentials for anyone looking to get off the pavement. This kit also makes a great gift.

The Essentials Recovery Kit utilizes the smaller ARB502 recovery bag making this a useful and compact recovery kit that can be stored in a standard ARB Outback Solutions Roller Drawer. Retailing for \$280, the RK11 Essentials Recovery Kit represents a value over purchasing each component individually.

Note: ARB endorses safe recovery practices and consumers should refer to the vehicle recovery guide supplied in the kit for information on the correct selection and safe use of ARB recovery products.
